de Calidad Turística

Compromís  
de Qualitat Turística

### \* Transparency

All the members of the museum work to bring contemporary art closer to the public, through the museum collections, temporary exhibitions, visits, workshops and varied activities.

Despite that, the museum is aware of the need of facilitating all the information related to its history, the building and the activities made in it. For this reason, the museum gradually publishes on its webpage all the information related to its different aspects. As the administrative and economic management depends on the Culture Ministry of the Alicante City Council, the staff, administrative processes and budget of the MACA are reflected on the organizational structure of the Alicante City Council itself, which is explained on its webpage.
